

# M17G8 Stitcher

The line of DeLuxe Stitcher Multiple Head Stitchers offers a solution to almost any bindery application. Like our Single-Head Stitchers, our **Multi-Head Stitchers** also boast **flat and saddle tables**, the flexibility to accommodate either Swivel-Style or Side-Feed Stitcher Heads and advanced safety features. Multi-Head Stitchers increase production speeds up to ten times to that of Single-Head Machines.

The **M17** Stitcher is the perfect machine for applications that are stitched as a large pad and later cut offline, such as brochures, ticket books and checkbooks. The maximum thickness **capacity is 5/16" (8mm)**. Position up to ten 26D or eight G8 heads on the mounting rails of this stitcher to best accommodate your specific bindery needs.
