

There is a single head Stitcher
to suit your bindery needs.

Our freestanding Stitchers all feature
adjustable tables for **flat or saddle stitching**
and a choice of Traditional or Side-Feed Stitcher Heads.

For your safety, each machine is designed
with overload protection and low voltage trips.

All of our Stitcher Machines meet the strict European
C.E. Safety and Electrical Standards.

The **M2** is ideally suited for the rapid output of booklets,
calendars and similar production runs due in part to its
5/16" (8mm) capacity and wide range of crown
sizes. This stitcher is perfect for the smaller bindery.
