

# M7 Stitcher

There is a single head Stitcher to suit your bindery needs.

Our freestanding Stitchers all feature adjustable tables for **flat or saddle stitching** and a 14 inch throat depth.

For your safety, each machine is designed with overload protection and low voltage trips.

All of our Stitcher Machines meet the strict European **C.E. Safety and Electrical Standards.**

Redesigned for the 21st century, the **M7** has a stitching **capacity of 7/8" (22mm)** and can accommodate eight different wire sizes including flat and round by only changing the clincher points.

This is the perfect machine for thicker work such as forms, pads and ticket books, but has the versatility to stitch just two sheets as well.
