

BOOKLETMAKER FOLDNAK M2

Nagel brochures make your documents more successful

Your documents professionally presented

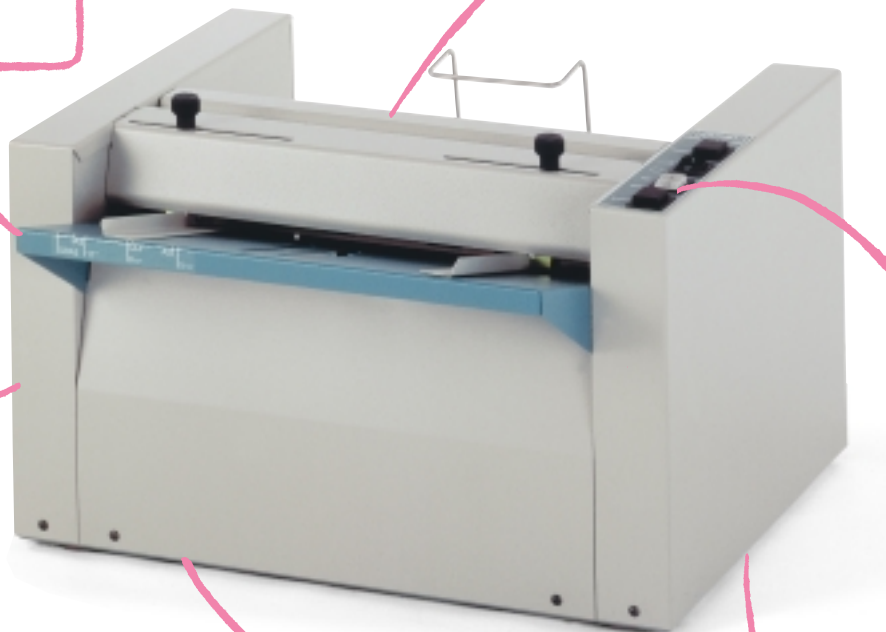

Practical loop staples mean no punching

Push-button operation

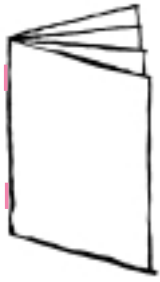

Fully automatic function

A4 to A6 brochure formats

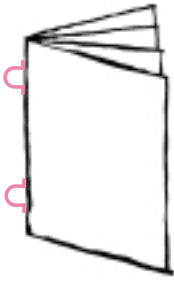

Low per-brochure costs

BOOKLETMAKER FOLDNAK M2

The classic brochure

Booklet with loop staples for filing without punching

Less can be more – folding without stapling

Brochures also possible in narrow portrait format

Bookletmaker brochures are the most professional way of presenting brochures, manuals, instructions, price lists and much more. Brochures are required in almost every office, in marketing, distribution and documentation departments, copy-shops, churches, schools, clubs and associations. Bookletmaker brochures can be opened completely flat without the spine breaking. Loop staples make onerous drilling superfluous. Costs per binding are negligible.

The Bookletmaker makes effective use of the brochure function of your copier or printer. The printed paper is automatically turned into a brochure.

This makes it possible to produce brochures on demand. No need to throw away out-of-date brochures, no storage, short delivery times.

Why not make an appointment today to have the Foldnak demonstrated?

Practical Nagel loop staples enable brochures to be filed in ring binders without being drilled.

In any case, Nagel staples guarantee firm, permanent stapling of brochures and pads.

The special bevelled tip of Nagel staples guarantees effortless penetration of paper and cardboard.

On request we can also supply you with a practical wheeled stand with a storage shelf.
